SECURITY BEYOND THE TREND

In September 2009 20% of worldwide attempts to hack or defraud were aimed at British companies and their customers

YOUR SYSTEMS ARE UNDER CONTINUAL ATTACK

Driven by advances in information technology the working environment of the 21st century is becoming increasingly flexible and diverse. While this online world provides many benefits, it also leads to an increased number of threats to your data and the devices that store it.

From internal user error through to hackers, Spyware and viruses, you need to be aware of the threats and have protection in place for your critical data and systems. An information security strategy is now vital in ensuring that your organisation can operate safely and profitably.

Implementing a security strategy requires a great deal more than buying an off-the-shelf security product. To ensure total security you need an integrated solution that has been designed and installed by professionals who understand the ever-evolving threats organisations are now facing.

INTEGRATED PROTECTION

Wem Technology offers a wide range of industry-leading security solutions that are designed to give you peace of mind and enable your users to carry out their jobs safely. We have partnered with and obtained accreditations from major security solution providers including: SonicWALL, Microsoft, McAfee, Symantec and Google.

This enables us to offer market-leading and integrated security solutions that cover:

• Firewalls
• Unified Threat Management
• Content Filtering
• Antivirus
• E-mail Scanning

SECURITY AT THE SPEED OF BUSINESS

Outdated stateful inspection methods are no match for today's firewall-evasive attacks. Our SonicWALL appliances are engineered to reduce risk, cost and complexity by integrating state-of-the-art firewall, UTM, wireless and VPN technologies to deliver comprehensive protection and maximum performance.

SonicWALL network security firewall solutions help protect against attacks and application vulnerabilities. Utilising ultra-high-speed multi-core architectures, SonicWALL firewalls deliver industry-leading price and performance.

CONTINUOUS REAL-TIME PROTECTION

SonicWALL UTM solutions employ an expanding array of seamlessly integrated services featuring gateway antivirus, anti-spyware, intrusion prevention, enforced desktop antivirus, content filtering and application firewalls.

This provides continuous real-time threat protection and dynamic signature updates, ensuring the strongest defence posture with minimal IT intervention.

PROTECT AGAINST LEGAL LIABILITY AND SECURITY RISKS

The opportunity to connect to Web sites that contain objectionable or even illegal content can leave organisations vulnerable to legal liability and unwanted security risks. Additionally, the use of instant messaging (IM) and peer-to-peer (P2P) applications compete for employees' time and can result in a significant loss of productivity.

Our content filtering solutions provide powerful and easy-to-use protection and control. They cover application blocking and malware protection through to enforcement of your Acceptable Use Policy and denying access to unauthorised Web sites.

> *"I don't have to worry about these Internet attacks and threats any more. I have the reassurance that my staff, my customer data and my systems are all protected."*

E-MAIL SCANNING AND ARCHIVING COMPLIANCE

The Data Protection and Freedom of Information Acts make the installation of an effective e-mail archiving system essential for many organisations.

Wem Email Security provides a hosted solution that helps keep your e-mail free from spam, viruses, phishing and other e-mail-based threats, well before they reach your enterprise. It also provides a cost-effective solution for archiving compliance and the many benefits this brings.

Unlike legacy products, it requires no hardware or software to install and maintain, thus greatly reducing your IT resource requirements and costs.

ABOUT WEM TECHNOLOGY

Wem Technology is part of a group of companies that together specialise in business development and support through technology that's way beyond the trend.

Our ethos is to apply our skill and expertise to all your technology needs, so you're free to focus on running your business.

CONTACT WEM TECHNOLOGY
